- **Economics – Is it Worth It?**
- **Paddock Layout & Design**
- **Designing a grazing System on a Local Farm**

What is Pastures for Profit?

This series is a class designed to teach the principles of Management Intensive Grazing.

Management Intensive Grazing is a systems approach that helps you better utilize grazed forages.

If you raise livestock, and utilize pasture to feed them during the year, then management intensive grazing can help you become more profitable!

Objective:

To increase participants' knowledge about forages and grazing in order to increase net profits, improve environmental quality and quality of life for farm families.
